IRC

{{{#irc (23:18) < jroes> ah (23:19) < jroes> hm, i like the way

```
works, but i was hoping the lines would wrap
(23:21) -!- gpciceri [~gpciceri@host181-130.pool8248.interbusiness.it] has quit [Read error: 110 (Connection
timed out)]
(23:36) < ThomasWal> you could also write a parser or processor
(23:38) <      jroes> i could?
(23:38) <      jroes> would that require modification on the moin end though?
(23:38) <      jroes> i cant change the wiki myself :x
(23:39) < ThomasWal> parsers and processors are plugable
(23:39) < ThomasWal> so you dont need to change the core code
(23:40) < ThomasWal> you need to copy it to the wiki data directory though
(23:40) <      jroes> well, what i meant to say was that i dont have access to the box running the wiki
(23:40) < ThomasWal> then this is no option awdsd asdasd sa asdasd sad asdadasds adasd asd asd asd asd a
dadad ad adad ad asd asd adad asdasd asd adad as d
(23:40) <      jroes> yeah :/
```
