

OpenEdit

OpenEdit is a collection of open source applications powered by Velocity. OpenEdit is used by web design shops to create and manage web sites.

Please see: <http://www.openedit.org/docs/opensource.html> to download.

- OpenEdit core <http://dev.openedit.org/anthill/projects/openedit/oesite.war> - Provides the layout engine, Velocity, Spring framework (all in under 1.5 megs)
- openedit-editor <http://dev.openedit.org/anthill/projects/openedit-editor/ROOT.war> - Online editing, usermanager, filemanager, version control and notification tools
- openedit-cart <http://dev.openedit.org/anthill/projects/openedit-cart/ROOT.war> - Catalog manager, shopping cart and storefront tools
- openedit-blog <http://dev.openedit.org/anthill/projects/openedit-blog/ROOT.war> - Blog administration and posting engine
- openedit-intranet <http://dev.openedit.org/anthill/projects/openedit-intranet/intranet.war> - Group calendar, in-out board, online editing of content, password protection
- openedit-search <http://dev.openedit.org/anthill/projects/openedit-search/search.war> - Nutch/Lucene based web crawling and searching
- openedit-archive <http://dev.openedit.org/anthill/projects/openedit-archive/ROOT.war> - Image search and catalog system. Based on openedit-cart. Creates thumbnails, does image conversions, advanced search, download cart contents as zip, tree based interface.

openedit-acme - This contains a crazy web demo <http://dev.openedit.org/anthill/projects/openedit-acme/ROOT.war> that integrates every plugin we have into one web application.

We are looking for people to join us on our mailing lists to discuss more.
