

GettingCentOS5Packages

Installing the required packages on CentOS 5

The following command installs all the required tools and libraries to build and install the Thrift compiler on a CentOS5/RHEL5 Linux based system.

```
sudo yum install automake libtool flex bison pkgconfig gcc-c++ boost-devel libevent-devel zlib-devel python-devel ruby-devel
```

These packages are available in the "base" repository.

For more information on the requirements see: [ThriftRequirements](#)

For more information on building and installing Thrift see: [ThriftInstallation](#)
