

# BuilderPluginRelease107

## Notes on the [MyFaces](#) Build Tools Builder Plugin 1.0.7 Release

Release manager: Leonardo Uribe

### Timeline

- Proposed release date: 2010-09-04

### Issues

- This release is necessary for release myfaces core 2.0.2.

### Testing

Here's how you can help us test the distribution.

Add this to your pom.xml (a node inside <project> )

```
<pluginRepositories>
  <pluginRepository>
    <id>test-builder-plugin-1.0.7</id>
    <name>Test repository for myfaces-builder-plugin 1.0.7</name>
    <url>https://repository.apache.org/content/groups/staging</url>
  </pluginRepository>
</pluginRepositories>
```

then use myfaces-builder-plugin:

```
<plugins>
  <plugin>
    <groupId>org.apache.myfaces.buildtools</groupId>
    <artifactId>myfaces-builder-plugin</artifactId>
    <version>1.0.7</version>
    ..... some stuff ....
  </plugin>
</plugins>
```

myfaces core 1.1.x, 1.2.x, 2.0.x and tomahawk use myfaces-builder-plugin so the most easy way is modify its pom (api/pom.xml, impl/pom.xml for example) for use it, then mvn install and check the generated artifacts.

### Tasks

### Proposed Release Announcement

```
}}}
```

```
== Diary ==  
<<Anchor(diary)>>
```

1. Preparing myfaces plugin parent, myfaces builder annotations, myfaces builder plugin and myfaces javascript plugin

- \* Try -DdryRun=true SUCCESS

```
{{{  
mvn release:prepare -DdryRun=true
```

- Release it! FAIL

```
mvn release:prepare -Dresume=false  
mvn install  
mvn release:rollback  
mvn release:prepare -Dresume=false
```

Note: Preparing the release will create the new tag in SVN, automatically checking in on your behalf.

Note: If you're located in Europe then release:prepare may fail with 'Unable to tag SCM' and 'svn: No such revision X'. Wait 10 seconds and run mvn release:prepare again.

```
mvn release:prepare
```

## 2. Stage the release for a vote

```
mvn release:perform
```

## 3. Ask for vote

Hi,

I was running the needed tasks to get the 1.0.7 release of Apache MyFaces Builder Plugin out.

This release includes some minor changes necessary to build myfaces core 2.0.x, like the update to Qdox 1.12, a new goal for javascript plugin to compress directories and put in a alternate location, and a typo error in an annotation in myfaces builder annotations.

Testing instructions are available at [3].

Please note that this vote concerns all of the following parts:

1. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-builder-plugin" v1.0.7 [1]
2. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-builder-annotations" v1.0.6 [1]
3. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-javascript-plugin" v1.0.2 [1]
4. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-plugin-parent" v1.0.4 [1]

The artifacts were deployed to a nexus repository ([1]).

Please take a look at the "1.0.7" artifacts and vote!

Please note: This vote is "majority approval" with a minimum of three +1 votes (see [3]).

```
-----
[ ] +1 for community members who have reviewed the bits
[ ] +0
[ ] -1 for fatal flaws that should cause these bits not to be released,
    and why.....
-----
```

Thanks,  
Leonardo Uribe

## 5. Vote success, continue with the procedure

## 8. ANNOUNCE mail

The Apache MyFaces team is pleased to announce the release of Apache MyFaces Builder Plugin.

Apache MyFaces Builder Plugin is a maven plugin, used internally in other projects like myfaces core and tomahawk for generate component classes, tag classes, faces-config files, .tld files and facelets taglib files. In other words, its several maven goals provide a component kit for generate jsf components with minimal effort.

Apache MyFaces Builder Plugin is available in the central Maven repository under Group ID "org.apache.myfaces.buildtools".

Enjoy!
