

CAPTCHA

Overview

The captcha component allows generating random images that can be placed with webforms to determine whether the user is human.

Usage

```
<t:captcha captchaSessionKeyName="#{captchaBean.sessionKeyName}" />
```

Attributes

captchaSessionKeyName - It determines the CAPTCHA session key name.

imageWidth - An integer to indicate the CAPTCHA width. default is 290.

imageHeight - An integer to indicate the CAPTCHA height. default is 81.
