4. Ask for vote

Hi,

I was running the needed tasks to get the 1.1.0 release of Apache MyFaces Commons out.

Please note that this vote concerns all of the following parts:

1. Maven artifact group "org.apache.myfaces.common" v1.1.0 [1]

The artifacts are deployed to my private Apache account ([1]).

There is also binary and source packages available at ([3])

For more info about this artifacts take a look at the site on ([4]).

Please take a look at the "1.1.0" artifacts and vote!

Please note: This vote is "majority approval" with a minimum of three +1 votes (see [3]).

```
-----
[ ] +1 for community members who have reviewed the bits
[ ] +0
[ ] -1 for fatal flaws that should cause these bits not to be released,
    and why.....
-----
```

Thanks,
Leonardo Uribe
