

Fieldset

Fieldset is used for logical grouping of controls using border with a legend

See the TLD docs @ <http://myfaces.apache.org/tomahawk/tlddoc/t/fieldset.html>

W3C recommendation @ <http://www.w3.org/TR/REC-html40/interact/forms.html#edef-FIELDSET>

Example

```
<t:fieldset legend="private address">

<h:panelGrid columns="2">
<h:outputText value=" " />

<t:selectOneRadio id="carChoice" value="#{theTestBean.carChoice}" layout="spread" >

<f:selectItem itemValue="0" itemLabel="Mr." />

<f:selectItem itemValue="1" itemLabel="Mrs." />

</t:selectOneRadio>

<h:outputText value="Name:" />
<h:inputText id="name" />

<h:outputText value="Last Name:" />
<h:inputText id="lastname" />
</h:panelGrid>

</t:fieldset />
```
