January2010Report

DRAFT⚠ version of the quarterly report of the Apache MyFaces PMC. Feel free to edit

MyFaces Quarterly Report January 2010

Summary

- Some community changes
- New releases
- Discussions

Community

- New committer:
    - Max Starets
    - Blake Sullivan
    - another vote passed; candidate has been invited; no account yet
- No new PMC members,
- Some new contributors (mainly MyFaces 2.0 related)

Releases

- MyFaces (sub) projects with new releases since the last report:
    - MyFaces Trinidad (Maven) Plugins 1.2.11
    - MyFaces Core 1.2.8
    - MyFaces Core 2.0.0-alpha (TCK not (yet) passed)
    - MyFaces Orchestra 1.4
    - MyFaces Builder Plugin 1.0.4
    - MyFaces Portlet Bridge (Master POM v3)

Milestones

- MyFaces Extensions Validator 1.1.3M2
- MyFaces Extensions Validator 1.2.3M2
- MyFaces Extensions Validator 2.0.3M2

Discussions

- Important to note again, but Apache MyFaces released the first alpha of the JSF 2.0 spec implementation. We are now "working" on the TCK...
- Apache MyFaces PMC member Werner Punz is now part of the JSF EG, representing Apache together with Martin Marinschek
- MyFaces 2 (post alpha) can now be integrated with Geronimo (see SVN REV: 893759)
- Work on Trinidad 2.0 is still going on. Several patches have been applied to that branch. A first release of a 2.0.0-alpha will come soon. The maven plugins for 2.0.x are on the vote (for a release).
- Orchestra started to work on JSF 2.0 stuff as well
- Extension-Scripting ongoing work in the area of dynamic Java recompilation and reloading for JSF, getting close to an alpha release (probably next month)
