## Milestones

## Misc

- In December 2008 the PMC voted Matthias Wessendorf to be the PMC chair. At that time we also evaluated the change to rotate that hat, but a mail thread in December 2010 showed that Matthias will continue to be the PMC chair
- Apache [MyFaces](#) PMC decided to create a twitter account (@MyFacesTeam)
- We started using [apache-extras.org](#) for code examples and integration tests

## Discussions

- We had a discussion about our release process and as result moved [MyFaces](#) to the latest apache-parent maven pom. This ensures that we meet the source release requirements accorded within the ASF.
- As side effect we now also use the Nexus based staging process.

## Project Branding

- Not started yet.
