

TobagoRelease108

Tobago 1.0.8 Release

Proposed Release Announcement

[MyFaces](#) Tobago provides a well designed set of JSF user interface components. The components are compatible with [MyFaces](#) Core 1.1.4 and the JSF Reference Implementation from Sun.

The [MyFaces](#) Tobago 1.0.8 distribution is available from:

- <http://myfaces.apache.org/download.html>

[MyFaces](#) Tobago is also available in the central Maven repository under Group ID "org.apache.myfaces.tobago".

The changes include:

Bugs

- application converter is not used for tx:date component
- theme jars cannot be loaded inside IBM [WebSphere](#)
- layout renderer causes [NullPointerException](#) when layouting panels
- [GridLayoutRenderer](#) ignores rows after the first row which is not rendered
- [UILayout.Row](#) [NotSerializableException](#)
- tx:date inside a tc:sheet causes [NullPointerException](#)
- [EmptyStackException](#) in sheet when showPageRange="none"
- password attribute of tc:in works only as a method binding in Facelets
- Tobago doesn't run with RI 1.1_02
- non-string item values not possible in tx:menuRadio
- [SelectOneChoice](#) in IE overrides z-index of menu
- resource directories need defined order
- [NullPointerException](#) when decoding [PageState](#) without state value in request
- warning page contains secure and non-secure items in IE when using HTTPS
- with popup window the suggest box renders behind the popup
- input suggest doesn't support umlauts
- using input suggest blocks page in IE without ActiveX

Improvements

- add globalOnly attribute to messages tag
- tc:link should support f:param
- [TabChangeEvent](#) should provide the same methods like the [TabChangeEvent](#) in Tomahawk
- date picker of tx:date should be surrounded by a form to prevent validation errors from other fields
- selectable modes in sheet
- increase the version of the Facelets dependency to 1.1.11

New Features

- autoreload feature for sheet
- provide a JDK 1.4 version of Tobago with Retrotranslator
- UICommand facet support for change and click events in selectOneRadio, selectBooleanCheckbox, selectManyCheckbox and selectOneChoice

For a complete list of please see:
