

TomahawkRelease114

Notes on the [MyFaces](#) Tomahawk 1.1.4 Release

Timeline

- 2006-06-21 - Tomahawk 1_1_4 branch created
- 2006-06-21 - Shared 2_0_3 branch created
- 2006-07-17 - Snapshots deployed to maven-snapshot-repository
- 2006-07-17 - Snapshots of the distribution assemblies [published](#)
- 2006-10-11 - Re-branched for Tomahawk 1.1.4 from r452854, created Shared 2.0.4 branch from r462858
 - http://svn.apache.org/repos/asf/myfaces/tomahawk/branches/1_1_4/
 - http://svn.apache.org/repos/asf/myfaces/shared/branches/2_0_4/
- 2006-10-15 - Bulk changed all issues marked Affects and Fix-For 1.1.5-SNAPSHOT to 1.1.4-SNAPSHOT instead
- 2006-10-16 - Snapshots of the distribution assemblies [published](#) (r464768)
- 2006-10-17 - Snapshots of the distribution assemblies [published](#) (r465130)
- 2006-11-03 - Snapshots of the distribution assemblies [published](#) (r465130)

NOTE: Tomahawk 1.1.4-SNAPSHOT should be used with MyFaces Core 1.1.5-SNAPSHOT.

NOTE: This Tomahawk release is blocked until MyFaces 1.1.5 is released and [TOMAHAWK-767](#) is resolved.

Issues

- [Unresolved Issues](#)
- [JIRA Release Notes](#)

Testing

Here's how you can help us test the snapshots prior to a release:

Download distribution assembly snapshots:

- <http://people.apache.org/builds/myfaces/tomahawk-1.1.x/>

Configure a <repository> for Maven 2:

```
<repository>
  <id>apache.snapshots</id>
  <name>Apache Snapshot Repository</name>
  <url>http://people.apache.org/repo/m2-snapshot-repository</url>
</repository>
```

And declare a dependency on the 1.1.4 snapshot:

```
<dependency>
  <groupId>org.apache.myfaces.tomahawk</groupId>
  <artifactId>tomahawk</artifactId>
  <version>1.1.4-SNAPSHOT</version>
</dependency>
```

Test your application, then, let us know the results (good or bad!) on *dev* at *myfaces.apache.org*. (You must be subscribed to post. See: <http://myfaces.apache.org/mail-lists.html>.)

Snapshots

To deploy the api and impl jars, including -sources and -javadocs, to <http://people.apache.org/repo/m2-snapshot-repository>:

```
cd /path/to/SHARED_2_0_4_BRANCH
mvn install
cd /path/to/TOMAHAWK_1_1_4_BRANCH
mvn deploy -Pgenerate-assembly
```

To build and publish the -src and -bin assemblies to people.apache.org:

```
cd /path/to/SHARED_2_0_4_BRANCH
mvn install
cd /path/to/TOMAHAWK_1_1_4_BRANCH
mvn install -Pgenerate-assembly
cd assembly
mvn assembly:assembly
scp target/assembly/out/* people.apache.org:/www/people.apache.org/builds/myfaces/tomahawk-1.1.x
```

TODO

- Add LICENSE/NOTICE to the -bin assembly
- Are the shared sources in the -src assembly?
- Check that every jar contains LICENSE/NOTICE
- Check in the [script](http://svn.apache.org/repos/asf/myfaces/maven/trunk/scripts) to <http://svn.apache.org/repos/asf/myfaces/maven/trunk/scripts>
- Figure out whether/how to release the Tomahawk example apps, add it to the script
