LoggingToCassandra

Logging to Cassandra

There are several projects that aim to integrate with logging frameworks or create frameworks of their own. A few of them are listed here:

- **DoItYourself Scribe server** - example code showing how to write to Cassandra with your own custom scribe implementation
- **Flume integration** - a Cassandra flume plugin with two sinks - a simple one and one for logsandra
- **Flume-Cassandra Log Processor** - Gemini Mobile's CDR Logprocessing plugin for Flume + Cassandra
- **Logsandra** - a Cassandra based log management tool
- **Scribe integration** - a scribe patch that allows writing to Cassandra
