

SimpleMappingQuestion

Simple Mapping?

```
<class name="Aclass" table="xtable">
  <field name="a1Attribute" column="x1column"/>
  <field name="a2Attribute" column="x2column"/>
</class>
<class name="Bclass" table="xtable">
  <field name="b1Attribute" column="x3column"/>
  <field name="b2Attribute" column="x4column"/>
</class>
```

None of the attributes in Aclass or Bclass is a reference to the other class. Is this a possible case and is this the correct metadata for it?
