Danny Angus See my [blog](#)

At Apache I'm a "Foundation Member" since Apachecon 2004, and PMC member of James, I got involved mainly because I wanted to make sure it was stable enough to use in a project I was involved with in the past, I stuck around because it was interesting and the people are nice. James is really cool and I want to see it prosper. I've also been appointed to the Jakarta PMC, I hope my involvement there, now that James has left, will help to maintain close ties between the projects for the benefit of everyone.

PGP Key: (Key has ICQ details in it)
