UseCases

Have an elegant solution to an issue and want to save others the pain? Create a subpage under this page and write away. Use Cases filled with marketing jargon will be removed. This is not a place to tout why your product is the greatest thing since sliced bread. It is a place to share real solutions to real problems.

*FieldSelector performance numbers In my particular case, using FieldSelector sped up my responses by a factor of about 10. See FieldSelectorPerformance

*Using SpanQuery for database join

*Using deletion neighborhoods for fast Fuzzy queries (http://wiki.apache.org/lucene-java/FastSSFuzzy)

*Using Brics for fast Regex queries (http://wiki.apache.org/lucene-java/FastRegexp)
