

# Log4jRelatedResources

## A Listing Of Log4j Related External Resources

### Projects

- [LogWeb servlet-based Log4j configuration facility](#) (open source)
- [VigiLog log file viewer](#) (open source)
- [log4jdbc SQL/JDBC logger](#) (open source)
- [JAMon monitoring tool](#) (open source) - JAMon provides a Log4j Appender that will
  - \*Aggregate how many messages of each Level have been logged(DEBUG/WARN/...) and when each of these were last invoked
  - \*Allow you to view a 'tail' of each Levels most recent messages via a JAMon web page
  - \*Count how many messages of any given content that have been sent to your log (i.e. 'Invalid login by user X'),
  - \*JAMon also provides a wealth of other realtime stats such as SQL Performance metrics, page hit times, and more.
  - \*No code changes are required to do any of this!
  - \*More info on the [JAMonAppender](#)
  - \*[JAMon Live Demo](#)
- [Layered Configurator](#) A configurator that uses other configurators in sequence, and can use system properties as substitution variables(open source)

### Wizards

- [WizardForge](#) provides wizards to generate log4j configuration files for version 1.2.x: [simple](#) and [advanced](#).

### Tutorials/Examples

- [Log4j tutorial](#), examples, log4j.properties vs. log4j.xml, Best practices for logging and exception handling, Tomcat configuration monitor, monitors changes to logfiles and updates the log4j configuration.

### Document Translations

- [Log4j](#) Chinese translation of Ceki Gülcü's famous Introduction to Log4j

### Other External Project Listings

- [Log4j Related Resources](#) - Articles, Books, Links, Utilities.
