

# general Home

This Confluence wiki space is a landing page for what used to be the generic landing page '[wiki.apache.org/general](http://wiki.apache.org/general)'.

It will contain links that might be handy to point to new locations where old wiki documents, historic mail archives etc point to.

All Apache Committers are welcome to edit this page and add appropriate links.

Things that do not need to be carried over from the old general wiki:-

- A lot of the old general wiki was links to project moin wiki farm pages, these are not needed. Redirects are in place.
- Infra related content and links has been deemed outdated and/or not relevant.

Add any relevant links/pointers/redirects below:
