

# Apache Directory Server 1.5.7 released !

Apache Directory team is pleased to announce the release of Apache Directory Server version 1.5.7, this is mainly a bug fix release.

Downloads are available at <http://directory.apache.org/apacheds/1.5/downloads.html>

## What's new ?

- The partition inheritance structure has been refactored to make implementing new partitions easy

## ChangeLog

## Bug

- [DIRSERVER-1488] - Accessing schema over JNDI delivers wrong values for mandatory/available attributes

## Task

- [DIRSERVER-1483] - Refactor the Partition inheritance scheme
