[Tapestry 5.8.1 release](#)
Thiago Henrique De Paula Figueiredo posted on Apr 04, 2022
Hello, Tapestry community! We've just released Tapestry 5.8.1. It's mostly about getting Tapestry-IoC to support all Java language features introduced between Java 9 and 17 https://docs.oracle.com/en/java/javase/17/language/. It also includes some other bug fixes and small improvements. Tapestry 5.8.1 is a drop-in replacement and recommended upgrade for Tapestry 5.7.0+ projects. All the details are in the release notes. Happy coding!

[Tapestry 5.8.0 release](#)
Thiago Henrique De Paula Figueiredo posted on Jan 26, 2022
Hello, Tapestry community!Tapestry 5.8.0 has just been released. It's focused on a couple of new features: Support for writing REST endpoints. Read more about this on its documentation page: https://tapestry.apache.org/rest-support-580.html https://tapestry.apache.org/rest-support-580.html. Support for Servlet API 3.0+ asynchronous requests. Full release notes at https://tapestry.apache.org/release-notes-580.html https://tapestry.apache.org/release-notes-580.html. Tapestry 5.8.…

[Tapestry 5.7.3 released](#)
Thiago Henrique De Paula Figueiredo posted on Aug 16, 2021
Tapestry 5.7.3 is a new release focused on some improvements and new features. Main ones are: Upgrading Hibernate's version from 5.1.1. Final to 5.4.32.Final. This required some changes in tapestry-hibernate due to some non-backward-compatible changes between these 2 Hibernate versions. If your project doesn't work with this new Hibernate version, you should be able to use version 5.7.2 of tapestry-hibernate and tapestry-hibernate with 5.7.3 of everything else without issues.…

[Tapestry 5.6.4 released](#)
[Thiago Henrique De Paula Figueiredo](#) posted on Apr 14, 2021

Tapestry 5.6.4 is a drop-in replacement and recommended upgrade for Tapestry 5.4, 5.5 and 5.6 releases. To upgrade, just update the dependency in your build configuration (Maven POM, Gradle build script, etc.) – or Download https://cwiki.apache.org/confluence/display/TAPESTRY/Download the new JAR file -- and the new version will just work. However, please review the How to Upgrade https://cwiki.apache.org/confluence/display/TAPESTRY /How+to+Upgrade instructions before upgrading.…

Tapestry 5.4.5 released

Thiago Henrique De Paula Figueiredo posted on Sep 10, 2019

Tapestry 5.4.5 is a drop-in replacement for Tapestry 5.4 releases. To upgrade, just update the dependency in your build configuration (Maven POM, Gradle build script, etc.) – or Download the new JAR file -- and the new version will just work. However, please review the How to Upgrade instructions before upgrading. This is a recommended upgrade due to including security improvements. Check 5.4.5 release notes https://tapestry.apache.org/release-notes-545.html for all the details.

Tapestry 5.4.2

Jochen Kemnade posted on Apr 19, 2017

We have created another release in the 5.4.x series. This should be a drop-in replacement for 5.4.x. Release Notes

Tapestry 5.4.1

Jochen Kemnade posted on Apr 13, 2016

This is probably old news, but we have created another release in the 5.4.x series. Have a look at the release notes and give the latest version a spin while we pick up pace for Tapestry 5.5.

Tapestry 5.4.0

Jochen Kemnade posted on Dec 21, 2015

The long wait is finally over. We are happy to announce the availability of the 5.4.0 release. Although a lot has changed under the hood, for most users, it should be a drop-in replacement for any version of the 5.3 series. Please head over to the Release Notes to read about the numerous changes that the 5.4.0 version brings and that make this release one of the best we ever made. The release is available from the Maven Central Repository, or as a direct download https://tapestry.apache.…

Tapestry 5.4 release candidate

Jochen Kemnade posted on Oct 30, 2015

After a series of alpha and beta releases, some of which have been released into the wild, we're happy to announce that we created a release candidate for the 5.4 release. We have fixed a couple of bugs, updated some internal libraries and improved performance and stability. This release is available from the Maven Central Repository, or as a direct download https://tapestry.apache.org/download.html. Please give it a spin and let us know how it is working for you. If you find any bugs,…

Tapestry 5.4-beta-26

Howard Lewis Ship posted on Jan 19, 2015

Tapestry 5.4-beta-26 fixes many bugs and paves the way towards the long awaited release candidate.

Tapestry 5.3.8

Kalle Korhonen posted on Dec 11, 2014

Apache Tapestry 5.3.8: compatible with Java 8. Tapestry is primarily available for download via Maven, from the Maven central repository: <dependency> <groupId>org.apache.tapestry</groupId> <artifactId>tapestry-core</artifactId> <version>5.3.8</version> </dependency> You can also download the binary, source, or JavaDoc archives. Tapestry 5.3.8 is the latest maintenance release from the stable 5.3 release branch. If you intend to run this release on JRE 8, make sure to read the the release notes.…

Tapestry 5.4-beta-22

Howard Lewis Ship posted on Sep 25, 2014

The latest beta preview release of Tapestry 5.4 is now available.   The release numbers are not consecutive because not every beta release is voted for wider release. This one has. Tapestry 5.4-beta-22 contains a significant number of bug fixes and minor improvements. Dependencies on third party libraries have been updated. This release is available from the Maven Central Repository, or as a direct download.…
