

Apache Geronimo Board Report - 2012-01 - January

Apache Geronimo Board Report

Apache Geronimo is an open source server runtime that integrates the best open source projects to create Java/OSGi server runtimes that meet the needs of enterprise developers and system administrators.

The community released our first Java EE 6 compliant server (Geronimo 3.0-beta-1). 3.0-beta-1 is both web profile and full profile compliant. There were multiple additional releases. A new committer Trygve Hardersen was voted as a new committer by the PMC.

Releases

The community had released Geronimo 3.0-beta-1 versions of our server, samples, and eclipse plugin. Geronimo 2.1.8 was also released.

JUGs and Conferences

Two Geronimo presentations were given at ApacheCon in Vancouver.

Community

The PMC accepted a code donation to the project from Hypobytes LTD.

New PMC Members

New Committers

Trygve Hardersen was voted as a new committer on the project.

Security

The Java HashTable collision Denial of Service vulnerability reported in late December affected Geronimo releases. The community has addressed the issue with new releases and patches.
