

Apache Geronimo Board Report - 2012-07 - July

Apache Geronimo Board Report

Apache Geronimo is an open source server runtime that integrates the best open source projects to create Java/OSGi server runtimes that meet the needs of enterprise developers and system administrators.

The community is currently voting on a Geronimo 3.0 server release along with release votes for Samples and DayTrader. The community also released XBean and several bundle releases in preparation for these releases. There are also discussions for a 3.0 release of the Geronimo Eclipse Plugin.

Releases

The community released Geronimo Tomcat, XBean, and several bundle releases. Release votes of Geronimo 3.0 server, samples, DayTrader, and the Eclipse Plugin are underway or imminent.
