

2024-03-13 Apache VCL Board Report

Description:

The mission of the Apache VCL project is to create and maintain software related to a modular cloud computing platform which dynamically provisions and brokers remote access to compute resources.

Project Status:

Current project status: Ongoing

Issues for the board: There are no issues requiring board attention.

Membership Data:

Apache VCL was founded 2012-06-19 (12 years ago)

There are currently 10 committers and 8 PMC members in this project.

The Committer-to-PMC ratio is 5:4.

Community changes, past quarter:

- No new PMC members. Last addition was Mike Jennings on 2020-08-24.
- No new committers. Last addition was Mike Jennings on 2019-01-04.

Project Activity:

- Last release: 2019-07-25
- Since our last report in December, we've had increased activity working toward a new release. We've had a fair number of commits and activity in JIRA tracking the commits (the project statistics page on reporter.a.o isn't accurately showing commit and JIRA activity).

Community Health:

We are encouraged by the progress we've made in becoming more active again after a long period of being dormant.
