Communication Methods

ⓘ This page is a work in progress. Please help by editing it.

TODO: Link to other places, like AdvocateHub.

Mailing-lists

subscribe to all CouchDB lists http://couchdb.apache.org/#mailing-lists

> no attachments are allowed beside zip files

Note when using GMail

There are some known issues when you are using GMail and want to integrate your Apache email address into GMail. Please read the configuration provided at http://www.apache.org/dev/user-email.html#configure. You can use your apache.org email address for the mailing-lists but you are not required to (committer level).

IRC

Very much of the discussions in all areas are held in the IRC channels. Here is the info to set things up:

- client: http://www.codeux.com/textual/, http://limechat.net/mac/
- server: irc.freenode.com
- channels: #couchdb, #couchdb-dev #couchdb-meeting, #couchdb-ci and #asfinfra
- register your nickname with:

```
/msg NickServ register <a_password> <your_email>
```

in preferences set start command:

```
/msg NickServ identify <your_password>
```
