Design and Development Issues

These pages are used by the Apache Tomcat community to:

- document development processes
- flesh out design ideas before starting implementation

Development Processes

- Building the Tomcat Native Connector binaries for Windows
- Building the isapi_redirector.dll (mod_jk) for Windows
- Managing translations
- Release process for Apache Tomcat

Design Issues

In progress

- Removing unpackWARs
- http workshop 2019
- Jakarta EE Release Numbering

Notes

- Encoding and URIs
- Jakarta EE TCKs

There is also an Archive of non-current issues.
