

Hadoop 3.0.0 release

Hadoop 3.0.0 has been released! Bits are available on the [official website](#).

Release schedule

For Hadoop 3, we are planning to "release early, release often" to quickly iterate on feedback collected from downstream projects.

To this end, we will be releasing a series of alpha and beta releases leading up to an eventual Hadoop 3.0.0 GA.

This is a **planned** release schedule. Future release dates are subject to change.

Downstream integration status

The goal for beta1 is for these downstreams to have their unit tests and integration tests run and triaged.

This is so we can discuss and address any burdensome incompatible changes before compatibility is locked.
