

Release Notes 5.4.2

 [Release Notes 5.4.1](#)

 [Release Notes](#)

[Release Notes 5.4.3](#) 

Tapestry 5.4.2 is a drop-in replacement for Tapestry 5.4 releases. To upgrade, just update the dependency in your build configuration (Maven POM, Gradle build script, etc.) – or [Download](#) the new JAR file -- and the new version will just work. However, please review the [How to Upgrade](#) instructions before upgrading.

Release Notes - Tapestry 5 - Version 5.4.2

Bugs fixed

- [\[TAP5-2544\]](#) - Using JPA EntityManager without explicit @PersistenceContext fails
- [\[TAP5-2565\]](#) - Enum <-> String coercion is not symmetric if enum class overrides toString()

Improvements made

- [\[TAP5-1962\]](#) - Grid JavaDoc - Explain how to use the PropertyOverrides parameter
- [\[TAP5-2225\]](#) - Create client-side API to call a component's event handler methods

Task completed

- [\[TAP5-2575\]](#) - Replace json.org-licensed classes with Apache-compatible versions
