

Infra

The Apache NetBeans (incubating) project uses different infrastructure. This page tries to collect all the information about our infrastructure.

The following information is available:

- netbeans.apache.org
- The page [Update Center and Statistics](#) explains how the update center tracks some download statistics.
- The page netbeans-vm.apache.org explains what we use this server for.
- The page [Jenkins](#) explains how we use Jenkins in NetBeans.
- The page <http://netbeans.osuosl.org/binaries/> describes how to upload binaries to our download server at the Oregon State University
